Expert & flexible CDMO for biologics, antibody conjugates and nanodrugs

GTP Bioways is a customer-centric and science-driven CDMO committed to offering **uniquely customised process development and GMP manufacturing services** for biologics, antibody-drug conjugates and nanodrugs.(mammalian cells and microbial cells)

With our cutting-edge facilities located in France, GTP Bioways can support biopharma companies **from preclinical to commercial production** of their innovative therapies.

Drawing on its expertise in solving difficult client problems, our team strives to offer a tailored approach, finely tuned to overcome your specific challenges. We are unique in our ability to develop agile solutions for challenging projects such as the production of difficult-to-express proteins, the development of atypical purification schemes or the formulation of nano-enabled products (NEP).

Vos attentes d'Adebiotech

- Echanges constructifs avec des partenaires impliqués dans la bio production, l'analytique.
- Ouverture à d'autres secteur que le pharmaceutique ou les biotechnologies
