

ENZYNOV2: Unleashing the power of Enzymes and Biocatalysis for industrial applications

Biocitech Paris-Romainville October 26-27, 2023

The Adebiotech transdisciplinary international scientific conference and networking forum **Enzynov'2** “- **Enzymes for industrial applications** » will focus on the utilization of enzymes and biocatalysis technologies in achieving more sustainable and productive industrial applications (*chemistry, cosmetics, pharma, food, others...*). State of the art of the technology, major market drivers according to sectors and manufacturing challenges linked to enzyme large-scale production or custom-designed enzymes, disruptive analytical technologies will be discussed.

One key objective of this Symposium and Networking Forum is to promote the exchanges between large-scale enzyme industrial producers, innovative start-ups and end users across a variety of industrial sectors (food/beverages, feed, chemistry, cosmetics, environment...), with the participation of key academic centers.

Speakers and members of the committee

Sophie BARBE, TBI (Toulouse Biotech)

Jean-Christophe BARET, Bordeaux Univ.

Sylvio BENGIO, Adebiotech

Denis CHEREAU, Improve/Iterg/Pivert

Sune CHRISTENSEN, Novozymes DK

Rita CRUZ, Ingenza Ltd. Scotland

Laurent DESROUSSEAU, Adisseo CINABio

Maureen DE WISPELAERE, DSM NL

Philippe GABANT, SYNGULON BE

David GUERRAND, Lallemand

Danielle LANDO, Adebiotech

Jean-Christophe LEC, Arkema

Juliette MARTIN, Protéus by Seqens

Alain MARTY, Carbios

Jans Erik NIELSEN, NOVOZYMES DK

Philippe PEBAY, Zymoptiq

Alexis RANNOU, Givaudan

Alexander SANDAHL, Danish Technology Inst

Magali REMAUD-SIMEON, INSA

Jacky VANDEPUTTE, consultant

Olivier VIDALIN, Protéus by Seqens
