ENZYNOV'2

Enzymatic Biocatalysis For Industry

*Unleashing the power of Enzymes and Biocatalysis
for industrial applications*

October 26-27 2023 • Biocitech Paris-Romainville

Warm Welcome to Paris on behalf of Adebiotech!

Sylvio Bengio and Team
Enzynov'2, October 26-27 2023

Enzymatic Biocatalysis For Industry
 Unleashing the power of Enzymes and Biocatalysis for industrial applications

October 26-27 2023 • Biocitech Paris-Romainville

Enzynov'2 Conference Scientific Committee

Enzymes: the unsung heroes of the natural world

ENZYMES

Friedrich Wöhler

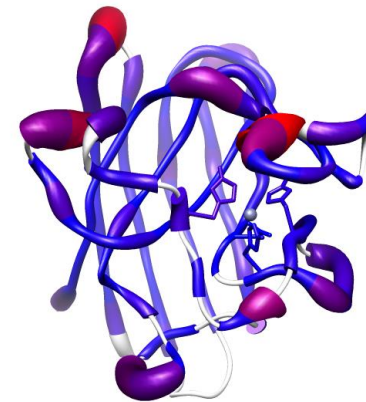

Jöns Jacob Berzélius

Anselme Payen

Wilhelm Kühne

Enzymes contribute to sustainability and environmental stewardship

- Reducing waster consumption
- Reducing energy consumption
- Reducing the use of harmful chemicals in industrial processes
- Lowering carbon footprint

Les Biotech doivent être un fer de lance pour réduire l'empreinte carbone

La planète se dirige vers une augmentation moyenne de la température mondiale de +2,0c. Si rien ne change, les températures mondiales augmenteront à +2,7c d'ici la fin du siècle.

Les industries de Bioproduction doivent montrer l'exemple .

Colloque Adebiotech "Empreinte carbone des industries de Bioproduction"
4 Juillet 2022 9H-17H30 Biocitech Romainville Paris

ENZYNOV'2

Enzymatic Biocatalysis For Industry

*Unleashing the power of Enzymes and Biocatalysis
for industrial applications*

October 26-27 2023 • Biocitech Paris-Romainville

**Keynote lecture: accelerating
sustainability through the use of enzymes**

JENS ERIK NIELSEN

Vice President of Enzyme Research at Novozymes A/S.
