

Biotechnology Engineer

Join our team in Venette, Oise !

We are currently seeking a Senior Biotechnology Engineer to join our team in Venette, Oise. You will play a key role in optimizing and maintaining our equipment, as well as enhancing the performance of our biotechnology unit. You will be the Fermentation Specialist, recognized for your expertise in the field.

Main Mission :

As a Senior Biotechnology Engineer, you will support operational teams. You will actively collaborate with project teams and the maintenance manager to ensure the success of our developments and the optimization of our operations. You will also serve as the primary contact for our clients, providing high-level technical support and effectively addressing their expectations throughout the scaling-up process.

Responsibilities :

- **Equipment Maintenance:** Diagnose failures, define and implement preventive and corrective maintenance plans, manage allocated budgets, and conduct supplier benchmarking analyses.
- **Optimization of Biotechnology Unit Performance:** Ensure the proper maintenance of equipment and infrastructure, maintain the operational condition of fermenters, document and share best practices, and lead continuous improvement initiatives.
- **Development of Biotechnological Processes:** Participate in the improvement and optimization of existing processes, develop new processes and protocols, and conduct tests and analyses to validate process performance.
- **Process Transfer from Laboratory to Pilot Scale:** Develop process transfer plans, execute the transfer from laboratory to pilot scale, anticipate technical constraints that clients may encounter, resolve scaling and process adaptation issues, and validate process performance at the pilot scale.
- **Monitoring and Project Management:** Conduct technical and regulatory monitoring, ensure compliance with client technical specifications, and perform critical analyses of results
- **Reporting and Activity:** Participate in regular meetings with the Team Leader and project team, prepare presentation materials to present results, and draft interim and final project reports.
- **Cross-functional Management:** Ensure the safety of employees and facilities, contribute to the continuous improvement of safety, organization, productivity, and costs, and support operational teams in enhancing their technical skills.

- **Client Support:** Act as the primary contact for clients, respond to their technical questions and concerns, and ensure their needs are met.

Profile/Prerequisites :

- Engineering degree in biotechnology or a related field.
- Significant experience in a similar position (10 years), preferably in the biotechnology industry, allowing you to develop a critical perspective on various processes.
- Strong technical skills in equipment optimization and maintenance.
- Analytical and problem-solving abilities.
- Excellent communication and project management skills.
- Ability to work in a team and collaborate with colleagues from different departments.
- Proficiency in English (written and spoken) to communicate with our international clients on-site or during virtual meetings.

What we offer :

- A dynamic and stimulating work environment.
- Opportunities for professional development and career advancement.
- A passionate, demanding, and dedicated team.

Additional informations :

- Contract Type: Permanent (CDI)
- Status: Executive, 218-day annual working time agreement
- Start Date: As soon as possible
- Location: Venette (60)
- Health Insurance: 60% employer coverage

About ATV

ATV Technologies is a dynamic and innovative company specializing in scaling up processes in chemistry and biotechnology. We offer tailored solutions for our clients and are committed to continuously improving our services.

ATV is a subsidiary of Avril, the industrial and financial leader in the French vegetable oils and proteins sector. Created by the agricultural world, the Group builds its growth on a unique value creation model: all profits are reinvested to support sector dynamics and its development in France and internationally.**

Its purpose, Serving the Earth, guides its actions, in line with its ambition to become, by 2030, a leader in plant-based transformation for agricultural, food, and environmental transitions.** Alongside its role as an investor, Avril has become a firm industrial player in plant-based transformation, from seed to finished product. Active in human food, animal nutrition and expertise, renewable energy, and chemistry, it operates a portfolio of businesses, each a leader in their respective markets. With nearly 8,000 employees across 19 countries, Avril achieved a turnover of €8 billion in 2023.**

Working at Avril means choosing a company that reconciles performance and responsibility, innovation and humility, collective and individual. Avril—the choice of a different path.**
